POOL HOUSE

A pool house does not only have to be functional, it can also be elegant.

Architects | Baumhauer
 Project address | Munich, Germany
 Gross floor area | 25 m²
 Main materials | glass
 Completion | 2010

This pavilion combines space for the lawnmower, pool equipment, storage space, shower, WC, changing facilities and a bar. The pavilion can be opened out by means of three large sliding doors. The equipment is stored behind the glass façade, the lines and edges of which dissolve into white dots and which reflects the garden vegetation. In the WC, shower, and changing room areas, curtains are used to flexibly provide as much privacy as desired.
